Hi everyone! I have a 2007 Kia Optima EX with a V6 engine. Recently when you open any of the 4 doors the dome light does not go on. If you push the switch to "on" manually, the dome light comes off, push "off" and it goes off but with the switch pressed for "door" the light does not come on for any of the 4 doors.

Probably an EVAP problem..emissions system system. When you fill up, the gas going in displaces air and gas fumes and those fumes (are supposed to) go in to a vent from the tank to a charcoal filled canister that soaks up the fumes, instead of coming out in your face and in to the air we all breathe.
