

### **Algebra Artin Solutions**

Until the 19th century, linear algebra was introduced through systems of linear equations and matrices. In modern mathematics, the presentation through vector spaces is generally preferred, since it is more synthetic, more general (not limited to the finite-dimensional case), and conceptually simpler, although more abstract.

Geometric algebra is a very convenient representational and computational system for geometry. We firmly believe that it is going to be the way computer science deals with geometrical issues.

At some point a longer list will become a List of Great Mathematicians rather than a List of Greatest Mathematicians. I've expanded my original List of Thirty to an even Hundred, but you may prefer to reduce it to a Top Seventy, Top Sixty, Top Fifty, Top Forty or Top Thirty list, or even Top Twenty, Top Fifteen or Top Ten List.

A range is an interval that defines the minimum and maximum values for any set of numbers or for the variation of a particular variable -- a stock price on the market, for example. The percent

relative range refers to the percentage ratio of the range to the average value in the set. Sum up the maximum and minimum ...

are all the possible residues. A complete residue system is a set of integers containing one element from each class, so would be a complete residue system for (mod 6).

### Residue Class -- from Wolfram MathWorld

A primitive root of a prime  $p$  is an integer  $g$  such that  $g \pmod{p}$  has multiplicative order  $p-1$  (Ribenboim 1996, p. 22). More generally, if  $\text{GCD}(g,n)=1$  ( $g$  and  $n$  are relatively prime) and  $g$  is of multiplicative order  $\phi(n)$  modulo  $n$  where  $\phi(n)$  is the totient function, then  $g$  is a primitive root of  $n$  (Burton 1989, p. 187). The first definition is ...

Espace vectoriel Définitions. Soit  $K$  un corps commutatif [1], [2], comme le corps commutatif  $\mathbb{Q}$  des rationnels, celui,  $\mathbb{R}$ , des réels [3] ou celui,  $\mathbb{C}$ , des complexes (on parlera dans ces cas d'espace vectoriel rationnel, réel ou complexe).
