Definition. A matrix is a rectangular array of numbers or other mathematical objects for which operations such as addition and multiplication are defined. Most commonly, a matrix over a field F is a rectangular array of scalars each of which is a member of F .

Matrix (mathematics) - Wikipedia

All courses offered by the Ursuline Academy of Dallas Mathematics Department are aligned with the National Council of Teachers of Mathematics Standard to encompass the conceptual underpinnings of Calculus, mathematics as problem solving, reasoning and communication, and mathematical connections with integration of technology.

Courses - Ursuline Academy Of Dallas

Mathematical economics is the application of mathematical methods to represent theories and analyze problems in economics. By convention, these applied methods are beyond simple geometry, such as differential and integral calculus, difference and differential equations, matrix algebra, mathematical programming, and other computational methods.
