

Chapter 18 Lab Dichotomous Keys

In this lab, you will first use a dichotomous key to identify sharks. A dichotomous key is built around pairs of statements that describe a visible trait. The reader must select the statement in each pair that best describes an organism. By following the steps in the key, the reader narrows down the list of choices and finally names the organism. After you have learned to use a dichotomous key ...

7. Once your dichotomous key is complete, test it with each item and revise your key, if necessary.

8. Exchange keys and items with a classmate. Use your classmate's key

Chapter 18 Classification Real-World Lab

LAB ____ . CLASSIFICATION & DICHOTOMOUS KEYS As we have discussed in class, with the help of Carolus Linnaeus, scientists have developed a hierarchical organizing and naming system for all organisms — from Kingdom all the way down to Genus and Species. They have also detailed the characteristics by which organisms are clustered into those groups. For example, all organisms which are warm ...

LAB . CLASSIFICATION & DICHOTOMOUS KEYS

dichotomous key to identify the genus and species of several different salamanders. Then, you will create your own dichotomous key to categorize a diverse group of wildflowers. Problem How is a dichotomous key used to distinguish among similar organisms? Pre-Lab Discussion Read the entire investigation. Then, work with a partner to answer the following questions. 1. How many choices does a ...
