

Chapter 6 Comprehensive Problem 2

In the last chapter we learned that deep neural networks are often much harder to train than shallow neural networks. That's unfortunate, since we have good reason to believe that if we could train deep nets they'd be much more powerful than shallow nets.

Neural networks and deep learning

Backups. Another essential tool for information security is a comprehensive backup plan for the entire organization. Not only should the data on the corporate servers be backed up, but individual computers used throughout the organization should also be backed up.

6. Learning to Classify Text. Detecting patterns is a central part of Natural Language Processing. Words ending in -ed tend to be past tense verbs . Frequent use of will is indicative of news text . These observable patterns — word structure and word frequency — happen to correlate with particular aspects of meaning, such as tense and topic.
