

Chimney And Stack Inspection Guidelines

As you tackle your spring cleaning list, don't forget to include your fireplace and chimney. While it can be tempting to just close up your fireplace for the season, there are several valuable benefits to scheduling a professional chimney cleaning and inspection.

Preparing Your Chimney for the Off-season in NH

Chimney Liners. Aluminum – An aluminum liner can be used to vent category 1 gas appliances with A.F.U.E. of 83% or lower. Aluminum liners are commonly used to downsize and vent orphaned water heaters when the main heating system is vented elsewhere, improving the performance of the appliance.

The steam generator or boiler is an integral component of a steam engine when considered as a prime mover. However it needs to be treated separately, as to some extent a variety of generator types can be combined with a variety of engine units.

Boiler (power generation) - Wikipedia

Install the drip edge. Metal drip edge isn't usually required (check with a local building official), but it gives roof edges a nice finished look, prevents shingles from curling over the edge, and keeps water from running directly down your fascia boards.
