The normal force is defined as the net force compressing two parallel surfaces together, and its direction is perpendicular to the surfaces. In the simple case of a mass resting on a horizontal surface, the only component of the normal force is the force due to gravity, where  $F_N = mg$ . In this case, the magnitude of the friction force is the product ...

Atrito, em física, é a força de contato que atua sempre que dois corpos entram em choque e há tendência ao movimento. É gerada pela aspéricidade (rugosidade) dos corpos (vide figura ilustrativa ao lado).
