The biggest-ever review of the state of nature on Earth concludes that we are in the midst of an accelerating extinction crisis, with human use of the land and sea resources mostly to blame.

Environment News - ABC News

Food science is the science of nature devoted to the study of food; it is often confused with "food technology". The Institute of Food Technologists defines food science as "the discipline in which the engineering, biological, and physical sciences are used to study the nature of foods, the causes of deterioration, the principles underlying ...
