Research Summary. My current research is at the intersection of communication theory, signal processing, and information theory. A primary research thrust is the advancement of MIMO (multiple-input multiple-output) communication technology including space-time coding, efficient receiver algorithms, channel quantization, synchronization ...

Resume - Prof. Robert W. Heath Jr.

In probability theory and statistics, the Poisson distribution (French pronunciation: ‿; in English often rendered / ˈpwɑːsɒn /), named after French mathematician Siméon Denis Poisson, is a discrete probability distribution that expresses the probability of a given number of events occurring in a fixed interval of time or space if ...
