First, number the vertices in order, going either clockwise or counter-clockwise, starting at any vertex. The area is then given by the formula Where  $x_1$  is the  $x$  coordinate of vertex 1 and  $y_n$  is the  $y$  coordinate of the  $n$ th vertex etc. Notice that the in the last term, the expression wraps around back to the first vertex again.

Answer: Domain of the function in the graph is:  $\{x \mid x \geq 0\}$  Step-by-step explanation: The domain of a function is all those values of  $x$  on which  $f(x)$  can be defined.

### (consider the function represented by the graph) What is ...

$f(x) = 2\cos(x)$   $g(x) = 3\sin(x + \pi)$  The range of a function is the set of all the possible dependent values that the relation can produce. using a graphical tool we can visualize the maximum values of the range of the function

### Functions $f(x)$ and $g(x)$ are shown below: $f(x) = 2\cos(x) \dots$

The slope of a line in the plane containing the  $x$  and  $y$  axes is generally represented by the letter  $m$ , and is defined as the change in the  $y$  coordinate divided by the corresponding change in the  $x$  coordinate, between two distinct points on the line.
