In mathematics, a system of linear equations (or linear system) is a collection of two or more linear equations involving the same set of variables. For example,

System of linear equations - Wikipedia

Until the 19th century, linear algebra was introduced through systems of linear equations and matrices. In modern mathematics, the presentation through vector spaces is generally preferred, since it is more synthetic, more general (not limited to the finite-dimensional case), and conceptually simpler, although more abstract.
