The set of journals have been ranked according to their SJR and divided into four equal groups, four quartiles. Q1 (green) comprises the quarter of the journals with the highest values, Q2 (yellow) the second highest values, Q3 (orange) the third highest values and Q4 (red) the lowest values.

Module Aims. This module aims to introduce you to computational methods which are essential for the engineering design of biomedical devices. The primary application focus for the introduction and practical application of the methods will be on biomedical problems related to the loco motor system, but the module will also demonstrate case ...
