

### **Planetary Orbit Simulator Student Guide**

The NAAP Planetary Orbits Lab is designed to facilitate understanding of Kepler's Three Laws of Motion as well as how velocity and force relate to the orbits.

### **Planetary Orbits - NAAP - UNL Astronomy Education**

The Nebraska Astronomy Applet Project provides online laboratories targeting the undergraduate introductory astronomy audience. Each lab consists of background materials and one or more simulators that students use as they work through a student guide.

### **NAAP Astronomy Labs - UNL Astronomy Education**

The student should be able to identify and describe each of Kepler's three laws of planetary motion. The student should be able to use Kepler's law of harmonies to make calculations regarding the radius and period of orbits of planets. Kepler's law of equal areas proposed that if an imaginary line

### **sl10details - physicsclassroom.com**

In the early 1600s, Johannes Kepler proposed three laws of planetary motion. Kepler was able to summarize the carefully collected data of his mentor - Tycho Brahe - with three statements that described the motion of planets in a sun-centered solar system.

Interstellar travel is the term used for crewed or uncrewed travel between stars or planetary systems. Interstellar travel will be much more difficult than interplanetary spaceflight; the distances between the planets in the Solar System are less than 30 astronomical units (AU)—whereas the distances between stars are typically hundreds of ...
