

Reverse Engineering Software

Reverse engineering, also called back engineering, is the process by which a man-made object is deconstructed to reveal its designs, architecture, or to extract knowledge from the object; similar to scientific research, the only difference being that scientific research is about a natural phenomenon.

Engineering is the profession involved in designing, manufacturing, constructing, and maintaining of products, systems, and structures. At a higher level, there are two types of engineering: forward engineering and reverse engineering.

Reverse engineering is het onderzoeken van een product (meestal een product van een concurrent, een wapen dat van een tegenstander is gestolen, een stuk software of een communicatieprotocol) om daaruit af te leiden wat de eisen zijn waaraan het product probeert te voldoen, of om de precieze interne werking ervan te achterhalen.
