

Rocket Ship Galileo Robert A

Rocket Ship Galileo is a juvenile science fiction novel by American writer Robert A. Heinlein, published in 1947, about three teenagers who participate in a pioneering flight to the Moon.

Rocket Ship Galileo - Wikipedia

"The Man Who Sold the Moon" is a science fiction novella by American author Robert A. Heinlein, written in 1949 and published in 1950. A part of his Future History and prequel to "Requiem", it covers events around a fictional first Moon landing in 1978 and the schemes of Delos D. Harriman, a businessman who is determined to personally reach and ...

The Man Who Sold the Moon - Wikipedia

The Mozhaets satellite is more directly named after the Mozhaisky Military Space Engineering Academy. The GeoOptics CICERO satellites seem to be just using that abbreviation and not actually named after Marcus Tullius Cicero.

Galileo was designed to make the first study of Jupiter and its moons and magnetosphere from orbit. The orbiter carried 10 science instruments and a atmospheric probe.

Overview | Galileo - NASA Solar System Exploration

Lifting your rocket from Terra's surface into circular orbit takes an unreasonably large amount of delta V. As a matter of fact, if your missions use Hohmann trajectories, the lift-off portion will take about the same delta V as does the Hohmann from Terra to the destination planet.

Surface to Orbit - Atomic Rockets

Everything about fundamental spacecraft design revolves around the Tsiolkovsky rocket equation. $\Delta v = V_e \cdot \ln[R]$ The variables are the velocity change required by the mission (Δv or delta-V), the propulsion system's exhaust velocity (V_e), and the spacecraft's mass ratio (R).
