fseek(), SEEK_SET, SEEK_CUR, SEEK_END functions in C

This short tutorial will teach you how to use Goal Seek in Excel to answer various forecasting questions or "what if" scenarios. The example provided also shows some limitations and gotchas of the tool. The tutorial is using Excel 2013, but the process is the same in other versions.

Use Excel Goal Seek Feature to Find Answers

Solution: Use Goal Seek to find out the minimum number of "Yes" votes you need to get: Set cell - the formula that calculates the percentage of the current "Yes" votes (C2). To value - the required percentage of "Yes" votes (66.67%).

How to use Goal Seek in Excel to do What-If analysis

However, if you want to do multiple goal seek calculations, you will normally have to do each by hand. Since each goal seek calculation has 3 inputs and will require you to wait before going onto the next calculation, it would take a lot of time to do multiple Goal Seek calculations each time something changes.

How to Use VBA to Automatically do Multiple Goal Seek ...

Once this condition is met, the Goal Seek tool provides you with the current value as a solution to the problem you've set up. Assuming that you don't want to change the input you've provided in the Set cell and To value input fields of the Goal Seek value, the item you must focus on is the Maximum Change between iterations.

Excel Goal Seek And GoalSeek VBA Method: Tutorial With ...

To value: 0 - we seek a solution to the equation $\det(A-cl) = 0$ By changing cell: B11 - i.e. we want to vary the value of c (our initial guess) Upon pressing OK , Excel will iterate and find the solution $c = 5.058047$ as in Figure 3.

Goal Seek | Real Statistics Using Excel

Technically, Goal Seek is a process of calculating a value by performing what-if analysis on a given set of values. For our purposes, Excel's Goal Seek feature lets you adjust a value used in a ...
