struc·tured (strŭk'chərd) adj. 1. a. Having a well-defined structure or organization; highly organized: a structured environment. b. Arranged in a definite pattern. 2. Psychology Having a limited number of correct or nearly correct answers. Used of a test. 3. Of or relating to a financial security that uses a complex or unusual financial ...

Structured - definition of structured by The Free Dictionary

Software analysis and design includes all activities, which help the transformation of requirement specification into implementation. Requirement specifications specify all functional and non-functional expectations from the software.

Software Analysis & Design Tools - Tutorials Point

When designers have to communicate decisions to stakeholders, one possibility is to use a requirements document. Another strategy could be using something different in order to avoid the risk of "taking a couple of days to get everyone on the same page": the task analysis grid is an interesting alternative to the standard requirements documents.

TASK ANALYSIS GRID | Service Design Tools

2 software/system engineering discipline, which consists of structured analysis and structured design (top-down design). (See the list of references for several books on the modern systems
